

FW-205

Anti-Fire Paint

THERMAL & FIRE PROTECTIVE COATINGS

PRODUCT PROFILE

Water-based intumescent coating that reacts to flame and is designed to provide up to 120 minutes of fire protection on steel, timber and concrete.

**18 kg**

PACKAGING

+5°C +40°C

APPLICATION TEMPERATURE

25±0,2

DENSITY

7.0-9.0

PH (25°C)

KEY BENEFITS

- See the product page for the complete performance profile.

TECHNICAL DATA MATRIX

Packaging	18 kg
Application Temperature	+5°C +40°C
Density	25±0,2
pH (25°C)	7.0-9.0
Reaction Temperature	200°C
Reaction to Fire Class	B S1 d0
Solvent	Su
Working Temperature	63°C
